An ambitious and independent developer based in the Philippines, I have always been self-motivated and driven since my early academic years. This self-motivation has enabled me to go beyond the course curriculum and acquire knowledge outside the standard offerings to achieve numerous goals along the way.

Relevant Experience

NextJS Developer   **Vauch**   **Apr 2023 - Jan 2024**

Philippines (remote, part time)

- Transformed Figma designs into fully functional interfaces using React, TypeScript, and Tailwind CSS.
- Developed highly scalable CRUD APIs using NextJS, optimizing system efficiency and ensuring seamless data management for enhanced performance.
- Implemented unit tests in Jest to help catch bugs early in the development process.
- Collaborated closely with founders, contributing to strategic planning and implementing key features.
- Integrated with PlanetScale (MySQL) and utilized Prisma as the ORM of choice.
- Implemented user authentication and access control with NextAuth.
- Implemented Zustand for efficient centralized state management, enhancing the maintainability of the application.
- Utilized: TypeScript, NextJS, Tailwind, Prisma.

Personal Projects

Creator | Solo Developer   **Axie Managers IO**   **August 2021 - August 2022**

Philippines

- Built & Launched a community-loved earnings tracker for an NFT gaming community and **amassed 160k+ users**.
- Developed a single-page application using React and TypeScript, integrating seamless local storage persistence and responsive design principles for an enhanced user experience.
- Self-taught Golang to create an automated job for concurrent retrieval of in-game data from Axie Infinity's APIs.
- Implemented a RESTful API in Go to allow the client-side app to interact with the server to retrieve or store data. PostgreSQL as the database and Redis for caching.
- Deployed the backend using docker-compose and used caddy as the web server to automatically provide an SSL certification.
- Implemented interactive and color-customizable charts with chart.js, light/dark mode, responsive design, fetching crypto prices and chart data from CoinGecko.
- Utilized: React, TypeScript, Go Lang, PostgreSQL, Redis, Docker, Caddy.

Creator | Solo Developer   **www.cutenotch.com**   **January 2025 - March 2025**

Philippines

- Designed and developed a macOS application that brings the Dynamic Island experience to MacBooks.
- Implemented real-time music playback controls for Spotify and Apple Music using AppleScript, enabling song tracking and playback management directly from the interface.
- Created a license and trial management system integrated with Gumroad, allowing users to activate or purchase licenses after the trial period.
- Built the app frontend using **React + TypeScript**, bundled with **Tauri** for lightweight, high-performance native integration.
- Delivered a **smooth, resource-efficient user experience**, balancing playful interactivity with productivity-oriented tools.
- Optimized for **multi-display setups**, ensuring adaptive layout behavior across MacBooks
- Utilized: Tauri, React, TypeScript, AppleScript.

Creator | Solo Developer   **www.gutlog.com**   **March 2025 - April 2025**

Philippines

- Developed an AI-enhanced macronutrient tracker powered by Google Gemma 3 via OpenRouter.
- Designed a mobile-first progressive web application that allows users to seamlessly take a snap of their food and log their macros.
- Utilized: Vite, React, NextJS, TypeScript and tailwind to build the web-application for optimal performance.

Education and Certifications

Bachelor of Science in Computer Science, ACLC College of Ormoc.   **2022 - 2026**

- **Coursework:** Java, Java Swing, HTML, CSS, JavaScript, NodeJS, ReactJS, MySQL, MongoDB, Express.

TVL, ICT - Computer Programming, ACLC College of Ormoc.   **2019 - 2021**

- **Coursework:** Java, Java Swing, HTML, CSS, JavaScript, PHP, MySQL/Relational databases.
- **Recognition:** Academic excellence, best in work immersion, best in programming, with high honors.
