

Relevant Experience

NextJS Developer	Vauch Philippines (remote, part time)	April 2023 - January 2024
- Transformed Figma designs into fully functional interfaces using React, TypeScript, and Tailwind CSS. - Developed highly scalable CRUD APIs using NextJS and TRPC. - Implemented unit tests in Jest to help catch bugs early in the development process. - Collaborated closely with founders, contributing to strategic planning and implementing key features. - Integrated with PlanetScale (MySQL) and utilized Prisma as the ORM of choice. - Implemented user authentication and access control with NextAuth. - Implemented Zustand for efficient centralized state management, enhancing the maintainability of the application. <u>Utilized</u>: TypeScript, NextJS, Tailwind, Prisma.		

Personal Projects

Developer	Axie Managers IO Philippines	August 2021 - August 2022
- Built & Launched a simple community-loved web-based dashboard for an NFT gaming community and amassed 160k+ users. - Developed a front-end application using React and TypeScript, integrating seamless local storage persistence and responsive design principles for an enhanced user experience. - With the official game API not providing historical data, I used Golang to concurrently fetch the official game API daily in order to fill in charts. - Used postgres for data storage and redis for caching. - Deployed the Go app using docker-compose and used caddy as the web server to automatically provide an SSL certification. <u>Utilized</u>: React, TypeScript, Golang, PostgreSQL, Redis, Docker, Caddy.		

Developer	Cute Notch Philippines	January 2025 - March 2025
- Designed and developed a macOS application that brings the Dynamic Island experience to MacBooks. - Implemented real-time music playback controls for Spotify and Apple Music using AppleScript, enabling song tracking and playback management directly from the interface. - Built the app frontend using React + TypeScript, bundled with Tauri for lightweight, performant integration. - Delivered a smooth, resource-efficient user experience, balancing playful interactivity with productivity-oriented tools. <u>Utilized</u>: Tauri, React, TypeScript, AppleScript.		

Education and Certifications

Bachelor of Science in Computer Science , ACLC College of Ormoc.		2022 - 2026
Coursework: Java, Java Swing, HTML, CSS, JavaScript, NodeJS, ReactJS, MySQL, MongoDB, Express. Recognition: Dean's Lister.		
Paytaca Blockchain Workshop		September 29 - 30, 2025
Coded smart contracts with CashScript and interacted with them on the client built with Quasar.		
TVL, ICT - Computer Programming , ACLC College of Ormoc.		2019 - 2021
Coursework: Java, Java Swing, HTML, CSS, JavaScript, PHP, MySQL/Relational databases. Recognition: Academic excellence, best in work immersion, best in programming, with high honors.
